Summary

A versatile professional with training in Computer Science with strong foundation in software engineering, cybersecurity and network system. I bring on board practical coding experience in Java, JavaScript and C#-building everything from enterprise-grade applications to security-aware systems.

My goal is to contribute to organizations by streamlining operations, supporting software architecture,and emerging technologies such as AI to create measurable impact and staying current. I thrive in roles that require confidentiality, interpersonal sensitivity, and efficiency in both people and paperwork

Experience

Creator & Lead Developer *June 2026 – Present*
Naet Remote / Kenya

- Co-founded and built Naet, a full-featured institutional management system for Kenyan higher education institutions, covering academic session management, enrollment, timetabling, fee collection, and role-based administration end-to-end.
- Designed a scoped, multi-tenant admin architecture spanning four jurisdictional tiers (Institution, School, Department, Lecturer), with automatic group and permission assignment enforced at the data layer via Django's admin and custom scoping logic.
- Built the fee management subsystem: per-class fee structures, per-student ledgers with real-time balance tracking, multi-channel payment recording (M-Pesa, bank, cash), and automated overdraft detection with carry-forward/refund flagging.
- Implemented signal-driven automation for student enrollment (automatic registration into core and common-unit courses) and academic session rollover, removing manual per-semester setup work.
- Delivered exam and timetable scheduling with cross-programme venue and lecturer clash detection.
- Architected a generic, event-driven ERP integration layer (Celery task queue with exponential backoff retry and full sync logging), allowing any external ERP to be onboarded without changes to core application code.
- Integrated SMS notifications via the Africa's Talking API for real-time student and staff communication.
- Authored the platform's data protection and legal compliance documentation, aligning it with the Kenya Data Protection Act 2019, Computer Misuse and Cybercrimes Act 2018, and CUE academic records retention requirements.
- Deployed and maintain a public live demo environment for prospective institutional clients.

Cybersecurity Lead *Nov 2025 – Sept 2026*
Google Developer Groups — University of Eldoret Chapter Eldoret, Kenya

- Led the chapter's cybersecurity activities, supporting students and developers in developing practical skills and awareness around cybersecurity and secure technology.

- Organized and hosted multiple technical sessions, workshops, and community events covering cybersecurity, networking, software security, and emerging technologies.
- Researched, prepared, and delivered technical presentations, breaking down complex concepts into practical and accessible material for student audiences.
- Coordinated with chapter leads and speakers to plan events, manage session logistics, and ensure smooth delivery of technical programs.
- Encouraged peer learning and knowledge sharing by creating opportunities for students to discuss technical challenges, security practices, and career pathways.
- Represented the cybersecurity track within the chapter and helped connect students with relevant developer, cybersecurity, and technology communities.

ICT Officer (Attache) *June 2025 – August 2025*
Milimani Law Courts Nairobi, Kenya

- Installed, configured, and maintained ICT equipment including laptops, desktops, printers, and IP phones across the registry.
- Provided first-line support to staff on hardware, software, VoIP, and application-related issues.
- Diagnosed and resolved internet and WiFi connectivity faults.
- Conducted ICT equipment audits and managed application installations.
- Supported the roll-out of in-house applications, technologies, and systems.
- Delivered end-user training on ICT systems and equipment.

Education

Degree, Computer Science *Aug 2022 – Nov 2026*
University of Eldoret Eldoret, Kenya

- **Status:** Awaiting Graduation
- **Relevant Coursework:** Data Structures & Algorithms, Cloud Computing, Software Engineering, Computer Organization & Architecture, Signal Analysis & Processing, Data Science

Kenya Certificate of Secondary Education (KCSE) — Grade B+, 2018–2022

Skills

Languages: Python, JavaScript, SQL,Java
Frameworks & Libraries: Django, Django REST Framework, React, Node.js, Angular, Celery,Spring-boot
Databases: PostgreSQL, MySQL, SQLite
Cloud & DevOps: AWS, Docker, Git, CI/CD, Linux
Systems & Networking: TCP/IP, VoIP, WiFi/LAN Troubleshooting, Windows & Linux Administration
Core CS: Data Structures & Algorithms, Software Engineering, System Design, REST API Design, Computer Architecture

Projects

Naet *2026*
Institutional management system for Kenyan higher education GitHub | site

- A full-featured Django platform handling student enrollment, academic session management, curriculum and timetabling, fee collection, and role-based administration for universities and colleges.
- Built a scoped multi-tenant admin architecture (Institution → School → Department → Programme → Class) with signal-driven auto-enrollment, exam/timetable clash detection, and a generic event-driven ERP

integration layer (Celery, exponential backoff retries) for syncing with external systems.

ACK Kericho Diocese Website *2026*
Church website for the Anglican Church Diocese of Kericho GitHub | site

- Responsive website providing information on the diocese, parishes, leadership, and community activities.

Certifications

- Introduction to Cybersecurity — Cisco Netacad (Jul, 2024)
- Data analytics — Cisco Netacad (May , 2024)
- Ethical Hacker — Cisco Netacad (May , 2026)
- Computer Hardware Basics — Cisco Netacad (May , 2026)
- Data Science Essentials With Python — Cisco Netacad (Jul , 2025)
- Introduction to IoT — Cisco Netacad (Jun , 2025)
- Network Addressing and Basic Troubleshooting — Cisco Netacad (Jun , 2025)
- Networking Devices and Initial Configuration — Cisco Netacad (May , 2025)
- Networking Basics — Cisco Netacad (May , 2025)
- NYS Soft Skills Training — Brighter Monday/Mastercard Foundations (May 2025)

Referees
